– CEQA: Traffic

Scope of Analysis	Conclusion & Recommendation
<ul style="list-style-type: none">Analysis of operations at nearby intersections, both Existing and Existing + Proposed Project	<ul style="list-style-type: none">Anticipated trip generation for the proposed project is an average of 1,360 trips per day, including 90 trips during the a.m. peak hour and 110 trips during the p.m. peak hour.All four study intersections would operate acceptably with the addition of project traffic.
<ul style="list-style-type: none">Evaluation of four Project Access Alternatives:<ol style="list-style-type: none">No Traffic SignalTraffic Signal for Apartments OnlyShared Traffic Signal at Project EntryShared Traffic Signal at Drakes Cove Rd	<ul style="list-style-type: none">All Project Access Alternatives have a less than significant impact. However, sharing the signal with Drakes Cove Road would provide the lowest vehicle delay on Drakes Cove Road.
<ul style="list-style-type: none">Vehicle Miles Traveled (VMT) analysis	<ul style="list-style-type: none">The project is presumed to have a less-than-significant impact to Vehicle Miles Traveled (VMT).
<ul style="list-style-type: none">Adequacy of facilities for pedestrians, bicyclists, and transit riders	<ul style="list-style-type: none">A controlled pedestrian crossing across East Sir Francis Drake Boulevard is recommended to connect the project site to the multi-use trail.
<ul style="list-style-type: none">Adequacy of emergency access.	<ul style="list-style-type: none">Sufficient emergency access is provided.
